

# **URIMAT**<sup>®</sup>

*the waterless urinals*

- *no water*
- *no chemicals*
- *no odour*

- The patented drain trap insert guarantees the smooth operation without sealing liquid. It is inserted into the respective opening in the urinal.
- The urine flows into the cylindrical internal piece of the drain trap and from there into the overflow area
- The urine pushes the float up, sealing the intake of the drain trap.
- The flexible sealing lip keeps odours sealed in.
- The urine is diverted into the sewage system via drain trap overflow.
